SUMMARY

Senior QA Automation Engineer with 6+ years of experience in designing and maintaining scalable UI, API, and End-to-End automation frameworks using Playwright, Cypress, Selenium, Appium, JavaScript, and Python. Experienced in API testing, CI/CD pipeline integration, AWS microservices validation, and Agile software delivery. Passionate about building maintainable automation frameworks that improve release quality, reduce regression effort, and accelerate software delivery.

EXPERIENCE

Senior QA Automation Engineer

Sept 2023 – Present

Globallogic(Hitachi)

Noida, India

- Increased automation coverage to approximately 80% by implementing reusable UI and API automation suites using Cypress and Playwright.
- Integrated automation suites with GitHub Actions and Jenkins CI/CD pipelines, enabling continuous validation during deployments.
- Executed cross-platform mobile automation for Android and iOS devices using Appium.
- Integrated Appium test execution into Azure DevOps pipelines, reducing manual execution effort and improving release validation efficiency.
- Performed comprehensive API, UI, Smoke, Sanity, Regression, and End-to-End testing across multiple microservices.
- Validated AWS-based microservices including EC2, SQS, S3, DynamoDB, CloudWatch, and Data Lake while debugging distributed applications using Falcon and Grafana.
- Collaborated closely with developers, product owners, and business analysts during Agile ceremonies to improve release quality and defect turnaround time.
- Developed reusable automation utilities using JavaScript and Python while contributing Playwright-based UI automation initiatives.

Senior QA Automation Engineer

July 2021 – Sept 2023

Cloud Analogy

Noida, India

- Developed reusable Cypress automation frameworks using Page Object Model, custom commands, fixtures, and data-driven testing techniques.
- Automated Android and iOS applications using Appium with Java and Python.
- Executed functional, regression, system, and end-to-end testing to ensure stable software releases.
- Collaborated within Agile Scrum teams by participating in sprint planning, backlog grooming, stand-ups, reviews, and retrospectives.
- Prepared test documentation, execution reports, and defect analysis while maintaining high automation quality standards.

IT Security Automation Engineer

Aug 2020 – July 2021

F.I.S.

Gurugram, India

- Developed API automation solutions that reduced approximately three hours of manual validation effort each day.
- Performed REST API validation using Postman while executing SQL-based backend verification.
- Built proof-of-concepts using Selenium, Java, and REST Assured to evaluate automation feasibility for enterprise applications.
- Created Jenkins jobs for scheduled and continuous execution of automation suites.
- Documented automation frameworks, user workflows, and knowledge transfer sessions using Confluence.
- Managed source code using Git while collaborating closely with cross-functional engineering teams.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, Python

Automation Frameworks: Playwright, Cypress, Selenium, Appium, REST Assured

Testing: UI Testing, API Testing, End-to-End Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing

CI/CD: GitHub Actions, Jenkins

Cloud: AWS (EC2, SQS, S3, DynamoDB, CloudWatch, Data Lake), Azure, Google Cloud Platform

Developer Tools: Git, GitHub, Docker, Postman, Node.js, VS Code, IntelliJ IDEA

Methodologies: Agile Scrum, JIRA

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology in Computer Science and Engineering

Greater Noida, U.P., India

2015 – 2019

W.H. Smith Memorial School

Higher Secondary Certificate, Science with Maths

Varanasi, U.P., India

2014 – 2015

W.H. Smith Memorial School

Secondary School Certificate, Science with Maths

Varanasi, U.P., India

2013 – 2014
